

Iterations

Exercise 1

1. In each of the following repetitive tasks, identify the activities to be done in the initialisation step, the repetition step, and in the decision step (which tells us when to exit the iteration):

1.1 Passing a single sheet of paper around, and asking each person to enter his/her name, phone number and email in it.

1.2 Looking for a house (with a specific house number) in a set of streets.

1.3 Calculating your monthly household expenses.

1.4 Counting the number of rooms in a house.

1.5 Making a list of all the buses that stop at a given bus-stop in the morning, and their frequency.

1.6 Finding the speed of a train by looking at the kilometer marks that are crossed on the way.
